

M-VAC SERIES

MEDICAL VACUUM FILTERS

operating pressure	20 to 2000 mbar(abs)
volume flow rate	7,5 to 787 Nm³/h
connections	3/8" to DN150
operating temp. range	1,5 to 65 °C
standard colour	RAL 9003

APPLICATIONS

- operating theatres
- maternity units
- dental applications
- pathology laboratories
- pharmaceutical applications
- mortuary and post-mortem rooms

DESCRIPTION

M-VAC filters are designed for medical vacuum applications. They are optimised for high-efficient removal of bacterial and other contamination (solids and liquids) from the suction side of vacuum pumps preventing damage to the pump and the potential biological infection of the surrounding environment. Removed liquids are collected in a transparent flask which can be removed for sterilisation.

The efficiency of the installed filter elements exceeds the 0,005% penetration specified in HTM 2022 for infectious disease units, when tested in accordance with BS 3928.

FEATURES

- Anodised Internals
- Compact Design
- Spanner Hex on Filter Bowl
- Includes Differential Pressure Gauge
- Includes Ball Valve & Drain Flask

• To calculate the correct capacity of a given filter based on actual operating conditions, multiply the nominal flow capacity by the appropriate correction factor.

MEDICAL VACUUM FILTERS - M-VAC

DESCRIPTION

M-VAC filters have been specifically developed for medical vacuum applications. These filters are optimised for high-efficient removal of bacterial and other contamination (solids and liquids) from the suction side of vacuum pumps preventing damage to the pump and the potential biological infection of the surrounding environment. Removed liquids are collected in a transparent flask which can be removed for sterilisation.

The efficiency of the installed filter elements exceeds the 0,005% penetration specified in HTM 2022 for infectious disease units, when tested in accordance with BS 3928.

APPLICATIONS⁽¹⁾

- Operating theatres
- Maternity units
- Dental applications
- Pathology laboratories
- Pharmaceutical applications
- Mortuary and post-mortem rooms

⁽¹⁾M-VAC filter housing can be used in variety of applications. For applications not listed please contact us or your local dealer.

TECHNICAL SPECIFICATION

Operating temperature	1,5 - 65 °C	35 - 149 °F
Operating pressure	20 - 2000mbar(abs)	0,29 – 29 psi
Initial pressure drop	30mbar	0,45 psi

MATERIALS

Housing material	Aluminum
Fittings, Screws	Brass, Brass-zinc plated, Steel
Cover	ABS
Sealing	NBR
Corrosion protection	Anodized
Outside protection	Powder paint coated (Epoxi-polyester base)
Lubricant	Shell cassida grease RLS 2
Filter media	Borosilicate micro fibers,
Drainage media	Polyester
Support (inner-outer)	Stainless Steel 1.4301
Bonding	Polyurethane
Endcaps	PA6 with 30% glass fibers
Sealing	NBR

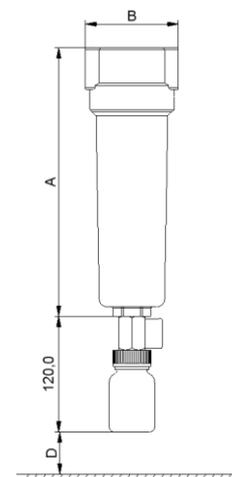

SIZES

FILTER HOUSING	PIPE SIZE [inch]	FILTER ELEMENT	Capacity ⁽²⁾		DIMENSIONS [mm]			VOLUME [l]	WEIGHT [kg]

M-VAC 1756 - M-VAC 2406	Category 2, Module H

CORRECTION FACTORS

- To calculate the correct capacity of a given filter based on actual operating conditions, multiply the nominal flow capacity by the appropriate correction factor C₁.
- To select a filter to match system flow conditions, multiply the system flow by the correction factor C₂ that corresponds to vacuum in the pipe.

OPERATING PRESSURE

[bar] absolute	1	0,9	0,8	0,7	0,6	0,5	0,4	0,3	0,2	0,1	0,05	0,02
[psi] absolute	14,7	13	11,6	10,2	8,7	7,3	5,8	3,3	2,9	1,45	0,73	0,29
C ₁	1	0,9	0,8	0,7	0,6	0,5	0,4	0,3	0,2	0,1	0,05	0,02
C ₂	1	1,1	1,25	1,43	1,67	2	2,5	3,33	5	10	20	50

MAINTENANCE

Replace filter element every 6 months or follow the instructions for specific filter element. Change the sealing when you disassemble filter housing. Once per year make a visual check of filter housing and make sure there is no visual damage. Flask can be sterilised at 140°C.
